What to expect during your time at the
LIGHTWARE LAS VEGAS DISCOVERY CENTER

A number of compelling topics will be covered during our one and a half day training.

The first of these topics – a pivotal component to the training – is Lightware's essential software, called Lightware Device Controller, most often referred to as LDC. Please follow the link below to the LDC page, then scroll down, locate, and click on the 'File Downloads' tab. Download the appropriate version of LDC onto the laptop you will be bringing to training:
https://lightware.com/lightware-device-controller

The second product line we will be learning about and working with is one of Lightware's most successful: Taurus. You can preview the amazing capabilities of Taurus here:
https://lightware.com/product-families/taurus-ucx

Next up on your Discovery Center program will be our most popular AV over IP solution, VINX. Before you get hands on with VINX with us at the Discovery Center, check out some its features:
https://lightware.com/product-families/vinx

Finally we will explore UBEX, Lightware's flagship technology, employed in applications where uncompressed 4K 60 4:4:4 video with zero frame latency and seamless switching are absolutely mandatory. Use the link below to take a look at the UBEX product family, and know that at training we will be seeing some fascinating real world examples of UBEX deployments:
https://lightware.com/product-families/ubex

We trust these introductions to the subjects we will cover together at the Discovery Center have whetted your appetite...

See you here soon!
The Lightware Las Vegas Discovery Center Team
