

What recycling programs are we planning to initiate?

Lightware is firmly committed to implementing further initiatives aimed at reducing the use of single-use plastics, thereby contributing to our efforts to mitigate climate change impacts.

In terms of waste and recycling strategies, we will undertake the following measures:

- Developing efficient work processes and consistently evaluating their implementation to enhance efficiency and minimize waste.
- Introducing novel business practices that align with the principles of the circular economy.
- Establishing waste management metrics to accurately track our progress in waste reduction and recycling efforts.
- Maintaining detailed records of waste disposal, recycling activities, and any incidents pertinent to waste management.
- Engaging with our suppliers and customers to foster sustainable practices across our entire supply chain.
- Monitoring emerging opportunities in waste management and recycling.
- Exploring alternative packaging solutions to reduce environmental impact.
- Striving to transition towards a paperless office environment.
- Organizing supplementary communication channels, training materials, and events to enhance awareness and education.

These steps underscore Lightware's dedication to making meaningful contributions to waste reduction and environmentally conscious practices.
